SUMMARY

B.E. undergraduate in Artificial Intelligence and Data Science with hands-on experience in **Python**, **Node.js**, **Express.js**, **SQL**, **REST APIs**, and **software testing**. Experienced in full-stack and AI/NLP application development with requirements analysis, debugging, troubleshooting, validation, and reliable software development. Strong problem-solving, analytical, communication, and collaboration skills.

TECHNICAL SKILLS

Programming: Python, SQL

Web & Backend: Node.js, Express.js, REST APIs, Backend Development

Frontend: HTML, CSS, JavaScript, Web Development

Databases: SQL, Database Concepts

AI & Data: Machine Learning, NLP, Data Analytics, Data Visualization, Power BI

Testing & Engineering: Unit Testing, Software Testing, Debugging, Troubleshooting, Requirements Analysis, Problem Solving

Tools: Git, GitHub, VS Code, Figma

PROJECTS

IT Operations Command Center

Node.js, Express.js, HTML, CSS, JavaScript

- Designed and developed a platform for tracking resource requests, service assignments, and status updates across stakeholder groups.
- Implemented backend workflows using Node.js and Express.js for tracking, assignment, and status updates with reliable data flow.
- Created dashboards to monitor active requests and resource availability for improved operational visibility.

Disaster Relief Coordination Portal

HTML, CSS, JavaScript, Node.js, Express.js

- Developed a full-stack web platform connecting NGOs, volunteers, and victims for real-time resource coordination.
- Implemented donation tracking, shelter management, and rescue logistics modules with structured backend data flows.

Detecting & Mitigating Hallucinations in LLM Responses

Python, NLP

- Built a Python-based evaluation pipeline to identify hallucinated content in LLM responses using systematic testing methods.
- Applied validation and mitigation techniques to improve output accuracy and reliability across test cases.

Sakhi AI – Women’s Health Support Assistant

Python

- Built an AI-powered Python application featuring SOS alerts, medical locators, and wellness guidance workflows.
- Designed application workflows with emphasis on accessibility, usability, and practical solution development.

EXPERIENCE

UI/UX Design Intern – Zidio

- Designed wireframes and interface layouts, translating requirements into functional user flows through product-team collaboration.
- Improved usability and accessibility through iterative revisions and cross-team communication.

Content Creation Intern – InAmigos Foundation

- Produced digital content for awareness campaigns while coordinating with team members to plan and structure deliverables.
- Supported audience engagement tracking and communication activities.

EDUCATION

B.E. – Artificial Intelligence & Data Science

2023 – 2027

GSSS Institute of Engineering & Technology for Women, Mysuru

CGPA: 8.1/10

CERTIFICATIONS

Deloitte Data Analytics Virtual Internship | AWS Academy Graduate – Data Engineering

ACHIEVEMENTS

- Participated in hackathons focused on real-world problem-solving and product innovation.
- Built multiple end-to-end projects spanning web development, AI, and UX design.
- Helped organize and manage department events, coordinating with students and faculty to ensure smooth execution.
